Height: 18 inches

Spread: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 3a

Group/Class: Aroma Series

Description:

This finely textured, aromatic variety has a low, semi-trailing habit; soft violet flower spikes rise above from spring until frost; looks great all season in beds and borders, or in containers

Ornamental Features

Aroma Violet Catmint has masses of beautiful spikes of lightly-scented violet flowers with sky blue overtones and burgundy calyces rising above the foliage from late spring to early fall, which are most effective when planted in groupings. Its small fragrant lobed leaves remain green in color with hints of gray throughout the season.

Landscape Attributes

Aroma Violet Catmint is a dense herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Planting & Growing

Aroma Violet Catmint will grow to be about 15 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Aroma Violet Catmint is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
