Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 5a

Description:

Incredible clusters of elegant pink and white flowers creating a stunning display of color in spring; rather unassuming the rest of the year; neat mounded habit; an excellent addition to mixed borders or hedges; drought tolerant once established

Ornamental Features

Yuki Kabuki Deutzia is covered in stunning racemes of pink cup-shaped flowers with white overtones at the ends of the branches from mid to late spring. It has dark green deciduous foliage. The serrated pointy leaves turn outstanding shades of burgundy and purple in the fall.

Landscape Attributes

Yuki Kabuki Deutzia is a multi-stemmed deciduous shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Yuki Kabuki Deutzia is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Yuki Kabuki Deutzia will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Yuki Kabuki Deutzia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
